POST EVENT REPORT

LEADERSHIP QUALITIES

Date: 20/07/2022

Venue: Lecture Hall 3

Time: 9:00 am - 10:00 am

Speaker : Dr. Javed Sodawala

Leadership is an ASSESSMENT made by OTHER clinicians, patients or team members about the physician's ability to lead and take care of the patients, team and complex clinical environment. Good leadership is important for the success of any business-oriented organization. Leaders have a key role as 'change agents and role models "Change agents' or doctor require four skills to manage change effectively.

RCDSR conducted a program on "LEADERSHIP QUALITIES" on 20/07/2022 at Lecture hall 3 for 1st yr students. Dr. Javed Sodawala was speaker for the day.

DEAN
Rungta College of Dental Science & Research
Kohku Road, Kurud, Bilhail (C.G.)

It has been seen that even in this cynical age, most people still trust the health professionals who serve them, and dentists are still among the most trusted of professionals. The dental profession is a vocation in which knowledge and skill is used for the service of others. As in many other healthcare fields, dentistry has undergone many changes in recent years. With new developments in areas, such as technology, equipment and materials, policies in managed care, third-party payment and infection control requirements as well as a rise in litigation, there are many new challenges for the private practitioner. One of the characteristics of a profession is adherence to a code of ethics. Being a healthcare provider, it carries with it a responsibility to individual patient and society. The special status that society confers on the professional requires them to behave in an ethical manner. Hence every individual dentist has a duty to recognize the reciprocity of the relationship that exists with society and the duties of covenantal fidelity were the words of wisdom spoken by the speaker, **Dr. Yunus. G Y.**, who is Post graduate teacher & P.G. guide in the discipline of Public health dentistry., Guest speaker in National Workshops, National and State level conferences. Guide for research activities (Survey) and ICMR student projects, Dissertations, Short term dissertations with numerous publications in National, International & Pubmed indexed journals.

DEAN
Bhubaneswar College of Dental Science & Research
Pungla, Bhubaneswar, Odisha, India

Dr. Yunus also emphasised with examples that the dentist has a duty to conduct his or her professional life in accordance with the ethical principles rooted in the moral rules based on the principles of beneficence: autonomy and justice, in both individual and societal

contexts. He urged that every dentist should maintain his or her level of knowledge and skill current as his important duty. The dentist has an obligation to participate in the professional community to help ensure just distribution of society's resources and to share the burden of professional self-regulation to the extent that such a privilege is granted by society. The current Principles and Codes which are helpful expressions of dentistry's professional obligations were put forth the participants.

The session was followed by a Guest lecture on Medico Legal Issues in Dentistry by **Mr. Avinash Sahu, Advocate, High court of Chhattisgarh, Bilaspur (C.G)**. Mr. Sahu addressed the gathering that there is a duty imposed upon the dentists to practice dentistry at the certain standard of care. A breach of this duty results in injury to the patient is called negligence. Such negligence can result in lawsuit against the dentist. He made aware the participants about the legal elements, as there are greater possibilities of dentist encountering such cases, particularly in the context of patient empowerment and increased desire for improved personal appearance. Mr.Sahu also provided general information regarding various dental negligent acts including Tortious liability, Contractual liability, Criminal liability, Statutory liability, Vicarious liability as negligence acts under which Dentists are liable and legal procedures available in India.

Dentists are often ignorant about the laws governing their profession. The speaker made an attempt to give simple explanations of various laws and legal issue affecting dentists

DEAN
 Institute of Dental Science & Research
 Bilaspur (C.G)
 Kohka, Road

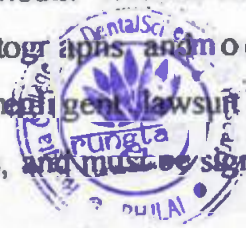

and emphasised about the need for maintaining the records officially and professionally to protect against any commercial, legal and medico-legal litigation. He briefly explained about "What should a dentist do in the event of a Dental mishap?". He educated the participants about bodies handling the medico-legal issues and medical negligence acts at various levels and the penalty for proved negligence like:

1. District Forum (one or more district form for each district). Jurisdiction up to Rs. 20 lakhs.
2. State Commission (one state commission for each state) Jurisdiction above Rs. 20 lakhs and up to Rs. 1 crore. The State Commission also serves as a supervisory agency and has the power to call for the records and pass appropriate orders in any dispute pending or decided by the District Forum.
3. National Commission (one national commission for entire country) Jurisdiction above Rs. 1 crore. The National Commission, similarly, acts as an appeal agency for decisions of the State Commission. Where the National Commission has served as the court of first instance the Supreme Court of India acts as the court of appeal.

Mr. Avinash Sahu emphasised that Records are the most important factors needed to prevail in the lawsuit. Written records, including medical and dental history, chart notes, radiographs, photographs and models, are the only available guidelines from which to deliberate in a negligent lawsuit and must be meticulously kept. All records must be contemporaneous, and must be signed and dated as legally, dentist written records carry more

weight than patient's recollections. It was also suggested that in case a negligent lawsuit is filed against the dentist, he/ she should consult a competent attorney who specializes in such litigation. The session ending with a take home message of "The best defence is avoiding the lawsuit in the first place".

POST EVENT REPORT

PROBLEM SOLVING AND DECISION MAKING

Date -23/11/2017

Venue- Lecture Hall 3

Time- 10.00 am- 11.00 am

Today's dentists face complex challenges; these include dealing not only with younger and healthier patients but also with aging populations who have an increasing number of illnesses, as well as with rapidly evolving biomedical and dental knowledge and technologies.

Academic education in dentistry should lead to the capability to solve complex open problems. The student entering university is only familiar with closed problems. Research into the making of a medical diagnosis has shown that novices do so differently than experts. These research results are summarised and are presumed to be transferable to dental diagnosing and treatment planning. RCDSR conducted a program at lecture hall 3 on 23/02/2017 from 10:00am - 11:00am.

Dr. Javed Sodawala was chief orator for the day.
